TRAITEMENT SANS BIOCIDES

Removes green algae and red lichen from roofs, walls and flooring.

Photo for information only.

Probiotic-based formula

Visible results in just a few hours

Biocide-free

BEFORE / AFTER
Terracotta tiles

COVERAGE

1 litre = up to 5 m² treated

SURFACES

- Roofs: slates, fibre-cement, tiles (concrete, terracotta), shingles, plastic, etc.
- Walls and facades: plaster, render, painted surfaces, wood, stone, brick, etc.
- Outdoor paving and floors: Terracotta tiles, natural or reconstituted stone, bare or coloured concrete, interlocking paving stones.

PROPRIÉTÉS

- **Ready to use.**
- Probiotic-based formula without biocide.
- Removes green algae, yellow and red lichen.
- **Three hours without rain is sufficient:** it can be used all year round.
- Visible effectiveness within a few hours (for green algae) and up to 3 months for lichens.
- **Made up of 98,5% natural ingredients.**
- Compatible with rainwater harvesting without the need to divert rainwater during application.
- Suitable for spraying near aquatic fauna and flora (rivers, lakes, etc.) in accordance with OECD standards 201 and 202.
- Does not alter the materials.

INSTRUCTIONS FOR USE

- If there is thick moss or large patches of lichen, brush or scrape beforehand.
- **It is essential to shake the product before use.**
- Apply the undiluted product, from the bottom up, to the dry or slightly damp surface, using a sprayer.
- Spray in a mist of fine droplets.
- **Never rinse after use.**
- A second application may be necessary.
- Clean the tools with water after use.

RECOMMENDATIONS

- This product is designed to treat lichens, algae and green growth. In the presence of black pollution, atmospheric dirt or grease, or heavy soiling, it is essential to clean the surface beforehand with our **ALGI-VERT NETTOYANT** product.
- After treatment and to prevent the micro-organisms from reappearing too quickly, the surface can be waterproofed with **ALGI-VERT PROTECTION**, once the surface is clean.
- **Protect sensitive surfaces (paintwork, aluminium, metal surfaces).**
- Application conditions: between 5°C and 25°C.
- Store in frost-free premises.
